

Arkestro Integrations

Designed with Integration in Mind

Integrations are at the core of Arkestro. They're not just a feature—they're what makes procurement a game changer. Our platform is designed to quickly and easily sync data with any ERP or P2P system, eliminating the common challenges procurement professionals face when working across multiple tools.

Stop Manual Workflows

Automate data entry and eliminate duplicate tasks.

Save Valuable Time

Free up your team for strategic priorities.

Prevent Costly Mistakes

Reduce errors and ensure consistent, accurate data.

Sync and Scale Across Platforms

Power events, optimize spend, save more, and update systems.

Turn Procurement Data Into Value

Arkestro's integration capabilities go beyond simple data syncing. They empower procurement teams with powerful tools to handle transactions quickly and make data-driven decisions at scale. Here's how integrating brings efficiency to your workflows:

Master Data Integrations

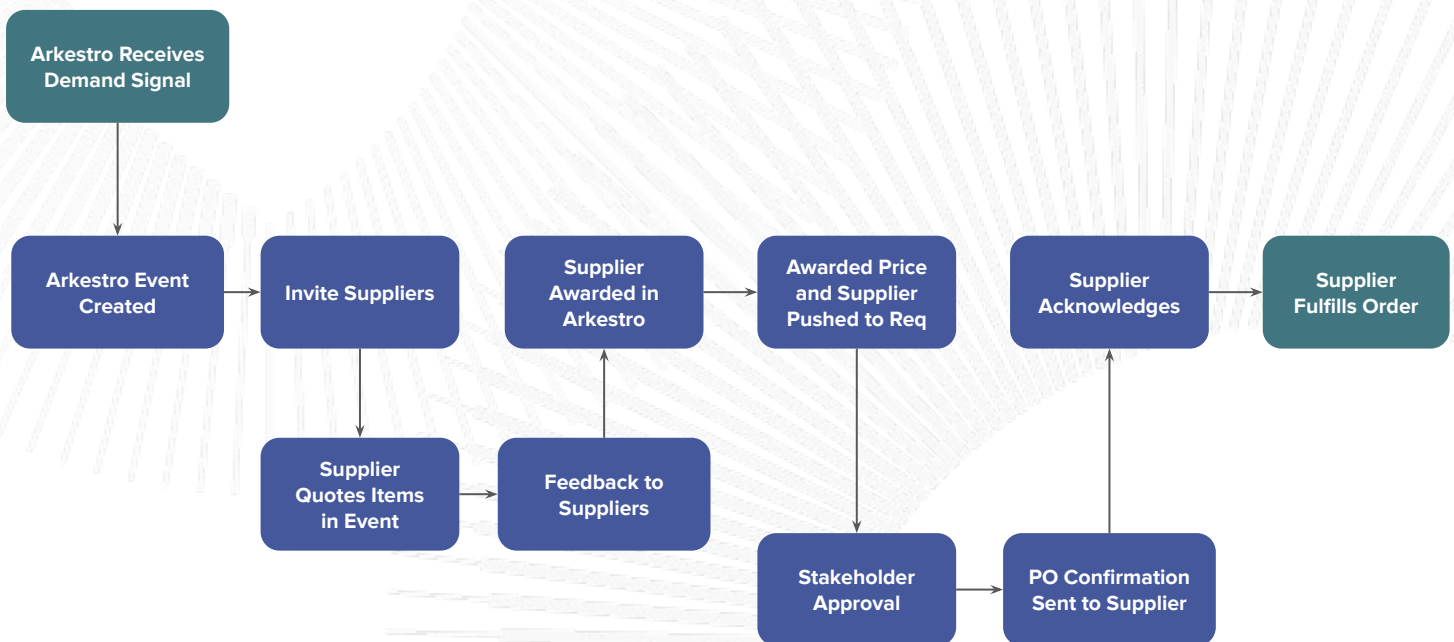

- **Supplier Master Data:** Upload supplier contact info for quick selection from a pre-populated list, reducing manual entry.
- **Item Master Data:** Import item data to allow for historical price discovery and data driven insights.
- **PO Historical Data:** Leverage past purchase data for smarter supplier recommendations and pricing.

Transactional Data Integrations

- **Event Creation:** Auto-generate procurement events using ERP or demand planning data, saving time.
- **Event Awarding:** Sync awarded prices back to the appropriate system, automating purchase orders or pricing updates.

Arkestro Integrations

Built to seamlessly integrate with leading industry platforms, including today's top ERP and P2P systems.

Why Arkestro?

Arkestro's integration capabilities ensure your procurement process is streamlined, efficient, and aligned with your business goals. Simplify your operations and unlock actionable insights with Arkestro.

Ready to put the power of Predictive Procurement to work, but not sure where to start? Our Professional Services team is on hand to walk you through the integration process. [Learn more.](#)
