

Predictive Procurement for Automotive

BETTER OUTCOMES, FASTER, AT SCALE

Deliver your procurement cost reduction objectives with PPO

Arkestro's Predictive Procurement Orchestration (PPO) is helping organizations in industries with some of the most complex procurement challenges in the world use the latest advancements in machine learning and behavioral science to unlock value across the organization and strengthen supplier relationships. Using the power of prediction, Arkestro enables procurement teams to impact more spend - helping them source more, and spend less.

13%

Average savings on MRO and Direct Material events (across several automotive customers)

Speed

Arkestro utilizes machine learning to significantly **improve the quality and speed of sourcing events**, reducing lead times from months to weeks or hours.

Scale

Our data shows that our customers are running up to 3x more events, enabling them to **actively manage a larger % of addressable spend**.

Time To Value

Achieve cost savings within the first 60 days - allowing you to **allocate funds to top of mind challenges**, like global sourcing to hit aggressive new model part price targets.

Amplify the impact of procurement's influence

Automotive customers:

- ✓ Achieve **cost savings of 16%** across multiple spend categories within the first 60 days
- ✓ Run **3X as many events** using the PPO platform
- ✓ Reach more addressable spend **with the same resources**

Quick wins
