

Your Data Security and Privacy, *Our Commitment at Arkestro*

Information Security Foundations

Industry Standard Cloud Native Hosting on AWS

We employ industry-standard cloud-native hosting services provided by AWS and Salesforce, ensuring a robust and reliable infrastructure for our digital operations.

Data Encrypted in Transit and at Rest (AES256 Encryption, HTTPS, TLS 1.2)

All data is secured with the highest standards of encryption, including AES256 encryption for data at rest and the use of HTTPS and TLS 1.2 for data in transit, safeguarding the confidentiality and integrity of your information.

Regular Security Assessments

To fortify our defenses, we conduct annual penetration tests, identifying and resolving vulnerabilities that may be exploited by malicious actors. Regular vulnerability scanning allows us to proactively address potential security weaknesses and maintain a robust security posture.

Employee Security Awareness

All employees are committed to annual security awareness training, fostering a security-conscious culture and equipping our workforce to recognize and respond to threats.

Compliance and Certifications

GDPR Compliant

We strictly adhere to the General Data Protection Regulation (GDPR) guidelines, ensuring that data privacy and protection are integral to our practices.

ISO 27001 Certified

Our information security management system (ISMS) is ISO 27001:2022 certified, demonstrating our commitment to maintaining a systematic approach to managing sensitive company information.

SOC-2 Type II

We successfully pass SOC-2 Type II audits without exceptions, assuring that our security controls meet the highest standards of security and reliability.

Additional Resources

For those who require a deeper understanding of our information security practices, our full Information Security Management System (ISMS) documentation is available at trust.arkestro.com with a valid mutual NDA.
